**Welcome**

This is a biannual meeting of keratoprosthesis (artificial cornea) experts and aficionados all over the world, whereby we exchange our experiences, new techniques and results of research for end stage corneal diseases which are otherwise deemed to blindness.

**Objectives of the meeting**

The aim of the meeting is to teach beginning or aspiring KPro surgeons on how to make insightful decision making on when and when not to do KPro surgery, to wisely choose which kind of KPro for individual cases and to effectively manage, as well as prevent possible complications. Moreover, expert surgeons will impart their long-term experience.
